

Brazil

Project Focus – Geography: Brazil

The aim of this project is to introduce the children to the diverse and unique culture of Brazil. Throughout the project, they will be encouraged to compare the geography of Brazil to that of the UK.

We will begin by studying the human and physical features of Brazil before placing Brazil in the wider context of the world and South America. We will investigate the many differences between urban and rural Brazil and case study the lives of people living within Rio de Janeiro.

Design Technology: Textiles

The children will investigate and analyse items made using textiles: the materials used and how they are made.

They will create and use pattern pieces to measure, mark and cut fabric; to sew design elements according to a design.

Maths

Multiplying and dividing fractions

Imperial and Metric measures

Ratio and Proportion

English

Balanced arguments/debate

Short stories with flashbacks

Class Text: Journey to the River Sea by Eva Ibbotson

Music –

All the learning is focused around one song from Benjamin Britten's Friday Afternoons: A New Year Carol. The children will research Benjamin Britten's life and listen to many of his other works.

Computing

Webpage Creation

The children will learn how to recognise the components of webpage layout and will devise their own web design containing clear navigation structures. They will learn about the implications of linking to, and using, content owned by other people.

RE

Why do Hindus try to be good?

PE

Dance

Basketball

Spanish

Asking and answering questions about where people live.

Science – Evolution and Inheritance

The children will learn about the following:

- That living things have changed over time.
- Fossils provide information about living things that inhabited the Earth millions of years ago.
- Characteristics are passed from parents to their offspring, but all offspring vary from their parents.
- Over time, variation in offspring can affect animals' chances of survival in particular environments.
- Animals and plants have adapted to suit their environment over many millions of years and this process can be called evolution.
